DETAILED ACTION

Claims 1-31 are pending in this application.

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 1/6/2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 1621

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis(US 6,613,908).

Instant claims are directed to a process of carbamoylating an alcohol using alkali metal cyanate and an acid in the presence of organic solvent.

Ellis is teaching a process of carbamoylation using alkali metal cyanate in the presence of an acid under anhydrous condition and using organic solvent, similar to those as claimed herein. See for example column 2, lines 8-15, column 3, lines 62-65, column 4, lines 44-49, column 5, lines 7-12 and lines 33-34. Note that various heterocyclic alcohols can also be carbamoylated, see column 2, line 56 through column 3, line 12. The difference between the reference and herein claimed process is that the reference has not carbamoylated particular compounds as claimed herein.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use the process of Ellis using starting material as claimed herein, with the reasonable expectation of achieving a high yield of product similar to those claimed herein, because the process per se is an analogous process, the conditions are similar, the solvents are similar, acids used are similar, absent evidence to the contrary. In re Durden Jr. et al. 226 USPQ 359.

6. US 4,147,716 is cited to show the state of the art.
